

LITTER BUG TAG

What you will need:

1. Objects to scatter around the play area. You can use trash/recyclable items such as cans, plastic bottles, paper towel tubes or use balls, stuffed animals or any other object than can be picked up. This will be litter.
2. A basket or a box.

How to Play:

1. Scatter objects around the play area
2. Put a box/basket in the center of the play area.
3. Decide on who will be "it".
4. The "it" tries to tag the other players as they move around the play area trying to pick up the litter. They can only pick up 1 piece of litter at a time.
5. The players try to get the litter to the box/basket in the middle of the play area without getting tagged.
6. If you get tagged, you go to the box/basket and take out a piece of litter and put it back on the ground. If the basket/box is empty do 5 jumping jacks. Then return to play in the game.
7. Play for a certain amount of time. Count the objects in the box/basket and the ones left on the ground to decide who has won the game. Switch the "it" for the next round.

Modifications:

1. Use different movement patterns as you play (run, skip, gallop).
2. If playing indoors use walking feet only.

Reflection:

Why is it important to put garbage/litter in garbage cans or recycling bins?
